

Workshop on Probabilistic Fault Displacement: Critical Issues, Data Needs, and Interface Plans

Gaps in Database

Current Status

- 22 eqks, as of 9/1/2019
 - multiple datasets for most events
 - *datasets = slip meas. & rupture mapping*
 - geology for most events
 - total displacement for ~25% of events
 - *total = discrete on-fault + distributed off-fault*
- 27 eqks by 11/1/2019
- Min. 35 eqks by 4/1/2020; likely to be ~45-50

Database Ver.1 Goal (4/1/2020)

Available Datasets with Geospatial Control
