**Report:**

Established in 2011, the SCEC Ground Motion Simulation Validation (GMSV) Technical Activity Group (TAG) is focused on developing and implementing, via collaboration between ground motion modelers and engineering users, testing/rating methodologies for simulated ground motions that are to be used in engineering applications. In the past year, for example, the GMSV TAG has implemented a gauntlet of validation tests on the SCEC Broadband Platform, a software system that can simulate 0-100 Hz seismograms using several alternative computational methods. Meanwhile, a national network of leading New Zealand Earthquake Resilience Researchers, QuakeCoRE, has begun research there on ground motion simulation and validation, including collaboration with practicing engineers on a document entitled “Guidance on the utilization of earthquake-induced ground motion simulations in engineering practice.” In Italy, a consortium of earthquake engineering laboratories known as ReLUIS has been working on regional simulation of earthquake events and their validation via models of buildings that have suffered damage in corresponding historical events.

In this workshop, we summarized these international GMSV efforts and others (GMSV efforts in Mexico City), further coordinated them, and provided discussions that led to initiation of future collaborations between individual researchers from these groups. The main goal of the workshop was to discuss the future of the GMSV TAG in SCEC5. We encouraged discussions on 1) the organization and structure of the TAG based on lessons learned from other international groups, focused on encouraging interactions between validation researchers, simulation modelers and end users, 2) the need for developing a database interface, where users can access the SCEC simulated earthquake ground motions, and 3) engagement with engineering users and outreach by moving towards an integrated earthquake ground motion simulation and validation program that builds on the knowledge from previous independently-funded GMSV TAG projects. These discussions led to a new proposal for continuation of the GMSV TAG that into SCEC5 with a broadened objective that includes focusing on validations for specific engineering applications as well as validations related to ground motion predictions. The workshop participants are listed below and included ground motion modelers, engineering users, and international delegates alike.

## International Workshop on Ground Motion Simulation Validation

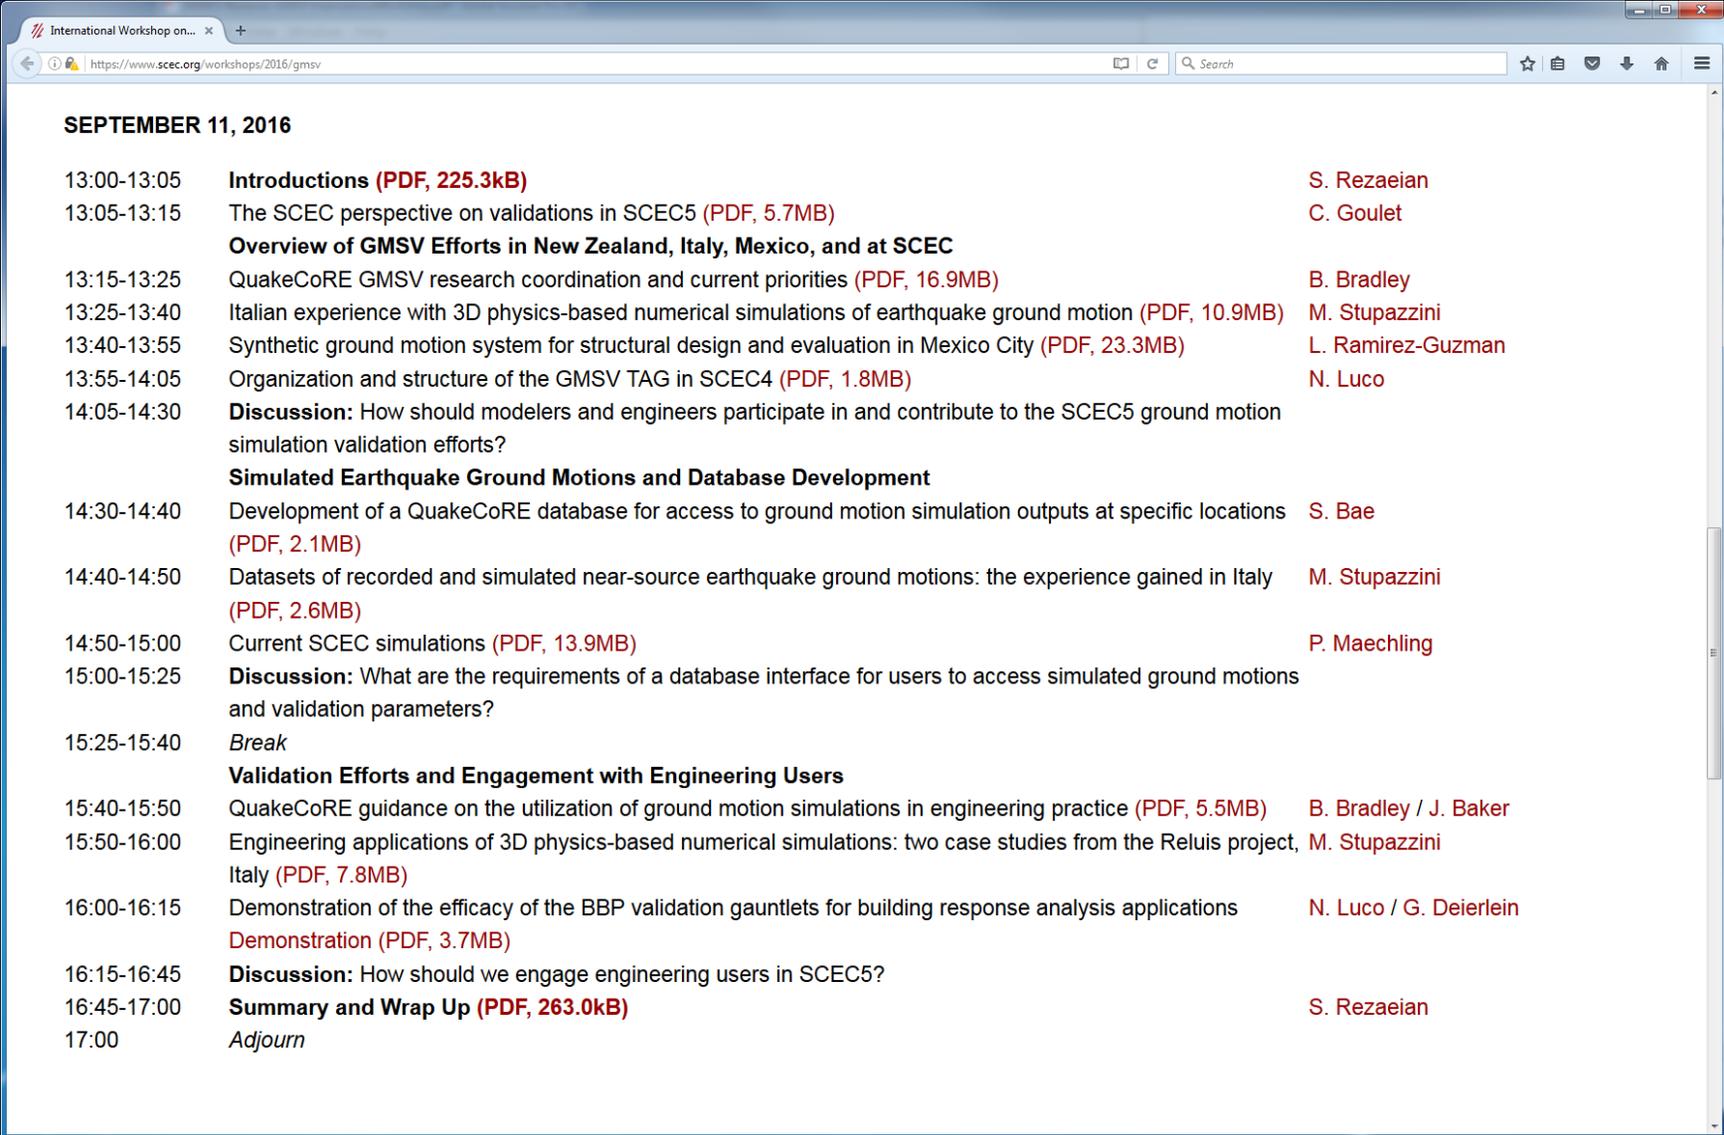

SCEC Award # 16162

### Conveners:

Sanaz Rezaeian and Nico Luco (USGS)  
Brendon Bradley (QuakeCoRE, NZ)  
Iunio Iervolino (ReLUIs, Italy)  
Leonardo Ramirez-Guzman (Mexico City)

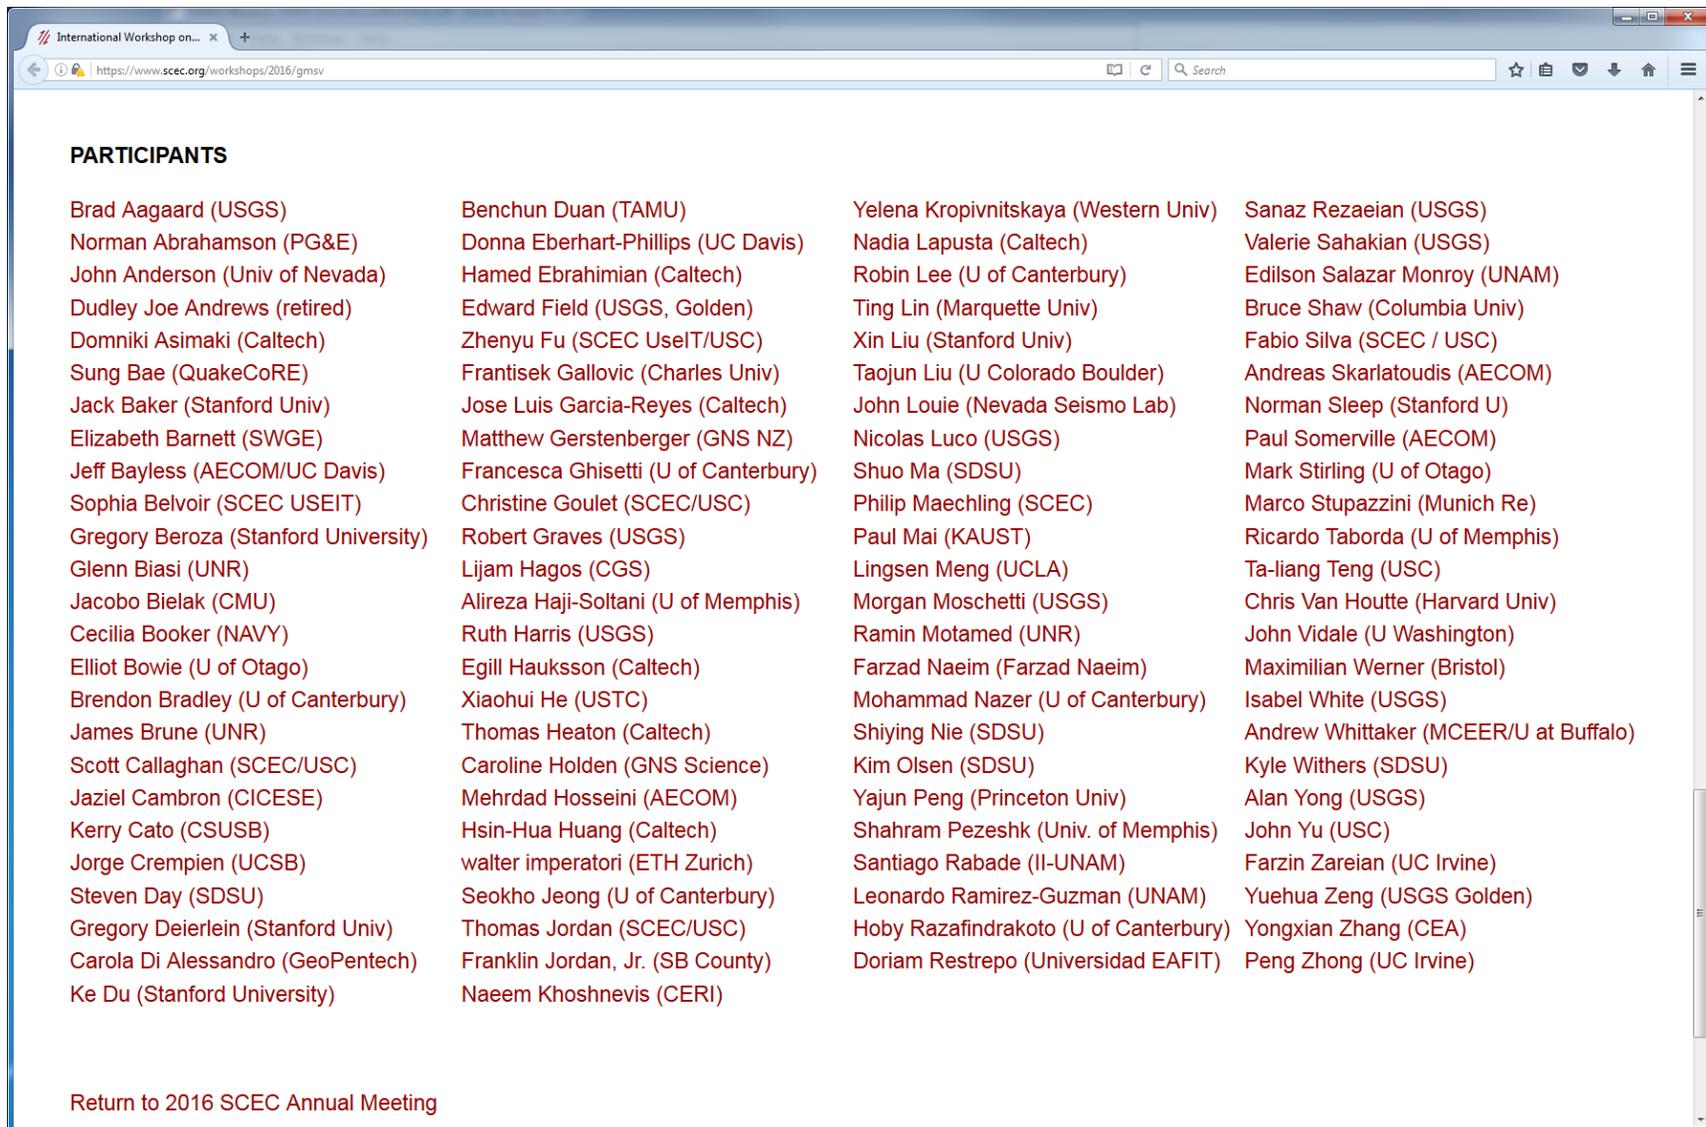

SCEC Annual Meeting, 11 September 2016, Palm Springs, CA

## Agenda:

SEPTEMBER 11, 2016		
13:00-13:05	<b>Introductions (PDF, 225.3kB)</b>	S. Rezaeian
13:05-13:15	The SCEC perspective on validations in SCEC5 (PDF, 5.7MB)	C. Goulet
	<b>Overview of GMSV Efforts in New Zealand, Italy, Mexico, and at SCEC</b>	
13:15-13:25	QuakeCoRE GMSV research coordination and current priorities (PDF, 16.9MB)	B. Bradley
13:25-13:40	Italian experience with 3D physics-based numerical simulations of earthquake ground motion (PDF, 10.9MB)	M. Stupazzini
13:40-13:55	Synthetic ground motion system for structural design and evaluation in Mexico City (PDF, 23.3MB)	L. Ramirez-Guzman
13:55-14:05	Organization and structure of the GMSV TAG in SCEC4 (PDF, 1.8MB)	N. Luco
14:05-14:30	<b>Discussion:</b> How should modelers and engineers participate in and contribute to the SCEC5 ground motion simulation validation efforts?	
	<b>Simulated Earthquake Ground Motions and Database Development</b>	
14:30-14:40	Development of a QuakeCoRE database for access to ground motion simulation outputs at specific locations (PDF, 2.1MB)	S. Bae
14:40-14:50	Datasets of recorded and simulated near-source earthquake ground motions: the experience gained in Italy (PDF, 2.6MB)	M. Stupazzini
14:50-15:00	Current SCEC simulations (PDF, 13.9MB)	P. Maechling
15:00-15:25	<b>Discussion:</b> What are the requirements of a database interface for users to access simulated ground motions and validation parameters?	
15:25-15:40	<i>Break</i>	
	<b>Validation Efforts and Engagement with Engineering Users</b>	
15:40-15:50	QuakeCoRE guidance on the utilization of ground motion simulations in engineering practice (PDF, 5.5MB)	B. Bradley / J. Baker
15:50-16:00	Engineering applications of 3D physics-based numerical simulations: two case studies from the Reluis project, Italy (PDF, 7.8MB)	M. Stupazzini
16:00-16:15	Demonstration of the efficacy of the BBP validation gauntlets for building response analysis applications (PDF, 3.7MB)	N. Luco / G. Deierlein
16:15-16:45	<b>Discussion:</b> How should we engage engineering users in SCEC5?	
16:45-17:00	<b>Summary and Wrap Up (PDF, 263.0kB)</b>	S. Rezaeian
17:00	<i>Adjourn</i>	

## Participants:

The image shows a screenshot of a web browser window. The address bar displays the URL <https://www.scec.org/workshops/2016/gmsv>. The page content is titled "PARTICIPANTS" and lists 48 individuals in a four-column grid. At the bottom left, there is a link: "Return to 2016 SCEC Annual Meeting".

**PARTICIPANTS**

Brad Aagaard (USGS)	Benchun Duan (TAMU)	Yelena Kropivnitskaya (Western Univ)	Sanaz Rezaeian (USGS)
Norman Abrahamson (PG&E)	Donna Eberhart-Phillips (UC Davis)	Nadia Lapusta (Caltech)	Valerie Sahakian (USGS)
John Anderson (Univ of Nevada)	Hamed Ebrahimian (Caltech)	Robin Lee (U of Canterbury)	Edilson Salazar Monroy (UNAM)
Dudley Joe Andrews (retired)	Edward Field (USGS, Golden)	Ting Lin (Marquette Univ)	Bruce Shaw (Columbia Univ)
Domniki Asimaki (Caltech)	Zhenyu Fu (SCEC UseIT/USC)	Xin Liu (Stanford Univ)	Fabio Silva (SCEC / USC)
Sung Bae (QuakeCoRE)	Frantisek Gallovic (Charles Univ)	Taojun Liu (U Colorado Boulder)	Andreas Skarlatoudis (AECOM)
Jack Baker (Stanford Univ)	Jose Luis Garcia-Reyes (Caltech)	John Louie (Nevada Seismo Lab)	Norman Sleep (Stanford U)
Elizabeth Barnett (SWGE)	Matthew Gerstenberger (GNS NZ)	Nicolas Luco (USGS)	Paul Somerville (AECOM)
Jeff Bayless (AECOM/UC Davis)	Francesca Ghisetti (U of Canterbury)	Shuo Ma (SDSU)	Mark Stirling (U of Otago)
Sophia Belvoir (SCEC USEIT)	Christine Goulet (SCEC/USC)	Philip Maechling (SCEC)	Marco Stupazzini (Munich Re)
Gregory Beroza (Stanford University)	Robert Graves (USGS)	Paul Mai (KAUST)	Ricardo Taborda (U of Memphis)
Glenn Biasi (UNR)	Lijam Hagos (CGS)	Lingsen Meng (UCLA)	Ta-liang Teng (USC)
Jacobo Bielak (CMU)	Alireza Haji-Soltani (U of Memphis)	Morgan Moschetti (USGS)	Chris Van Houtte (Harvard Univ)
Cecilia Booker (NAVY)	Ruth Harris (USGS)	Ramin Motamed (UNR)	John Vidale (U Washington)
Elliot Bowie (U of Otago)	Egill Hauksson (Caltech)	Farzad Naeim (Farzad Naeim)	Maximilian Werner (Bristol)
Brendon Bradley (U of Canterbury)	Xiaohui He (USTC)	Mohammad Nazer (U of Canterbury)	Isabel White (USGS)
James Brune (UNR)	Thomas Heaton (Caltech)	Shiyong Nie (SDSU)	Andrew Whittaker (MCEER/U at Buffalo)
Scott Callaghan (SCEC/USC)	Caroline Holden (GNS Science)	Kim Olsen (SDSU)	Kyle Withers (SDSU)
Jaziel Cambron (CICESE)	Mehrdad Hosseini (AECOM)	Yajun Peng (Princeton Univ)	Alan Yong (USGS)
Kerry Cato (CSUSB)	Hsin-Hua Huang (Caltech)	Shahram Pezeshk (Univ. of Memphis)	John Yu (USC)
Jorge Crempien (UCSB)	walter imperatori (ETH Zurich)	Santiago Rabade (II-UNAM)	Farzin Zareian (UC Irvine)
Steven Day (SDSU)	Seokho Jeong (U of Canterbury)	Leonardo Ramirez-Guzman (UNAM)	Yuehua Zeng (USGS Golden)
Gregory Deierlein (Stanford Univ)	Thomas Jordan (SCEC/USC)	Hoby Razafindrakoto (U of Canterbury)	Yongxian Zhang (CEA)
Carola Di Alessandro (GeoPentech)	Franklin Jordan, Jr. (SB County)	Doriam Restrepo (Universidad EAFIT)	Peng Zhong (UC Irvine)
Ke Du (Stanford University)	Naeem Khoshnevis (CERI)
